

WHITEPAPER

VERSION: 1 (2 SEPTEMBER 2023)

Beam GO!

Let's play!

"Bingo is a game in which players mark off numbers on cards as the numbers are drawn randomly by a caller, the winner being the first person to mark off all their numbers."

Beamgo is a contraction of **Beams** and **Bingo**. So Beamgo is a variant of bingo. However, there are minor differences.

Beamgo uses modern technology as blockchains, cryptocurrency wallets, non fungible tokens (**nft**), and **QR-beams**. Everything takes place on the **Enjin Matrixchain**. The Enjin Matrixchain is a blockchain designed by the Enjin Company.

Beamgo only uses this technology. The Enjin Company isn't related with the Beamgo Project.

To participate in **Beamgo**, every player needs the **Enjin Wallet**. It is a blockchain wallet where cryptocurrency and NFTs are kept. The Enjin wallet is free, and can be downloaded in the iOS Appstore or the Android Google Play store. Participating in Beamgo is **free** (additional fees may apply at the player's choice).

Download Enjin Wallet

<https://play.google.com/store/apps/details?id=com.enjin.mobile.wallet>

<https://apps.apple.com/us/app/enjin-nft-crypto-wallet/id1349078375>

As already told there are some minor differences between Beamgo and Bingo:

1. There are **no different playing cards** at beamgo. Every participant has the same "card".
2. It is not **played with** numbers, but with **nfts**.

The NFT's are distributed through **Enjin Beams**. Enjin Beams is the technology from the company Enjin to distribute nfts / assets due QR-codes. A QR code can be scanned in the Enjin Wallet.

After it is scanned, an NFT appears in the Enjin Wallet. The **received NFT** will be **random for each player**.

Technical information about the used technology

Enjin Wallet: <https://enjin.io/products/wallet>

Let's play Beamgo!

How to win Beamgo?

As told before the players get random nfts which they can mark off. The goal is the same as in Bingo: get as first a **horizontal**, **vertical** or **diagonal** row.

Beamgo will be played in **rounds**. Each round has **3 winners**. The prizes of every round are announced before the round starts. **Every round contains 25 unique NFTs** created by **one artist**. The prizes will be cryptocurrency, nfts, ...

The first winner is the person who has as first a beamgo-line.

The 2nd winner is the second person who has 2 different kind of beamgo-lines (horizontal / vertical or diagonal).

The 3rd winner is the person who has as first a full card.

The **3rd winner** is the **grand prize (full beamgo card)**. **The first 2 prizes are possible to win without extra costs.**

The **3rd prize** is the only prize **exclusive** for **Beamgo Token holders** (as you need a Beamgo Token* to fulfill this).

*more later in the documentation

You really want to win?

Participating in Beamgo is free to play but the player can increase his chances:

1. **Beamgo Token**
2. Beamgo Tickets

The Beamgo Token

The Beamgo Token is a **unique NFT with benefits**. The Beamgo Token can be bought on the NFT.IO marketplace as a NFT. The Beamgo Token is a **1-time purchase** and counts for every Beamgo-round.

The Beamgo Token can be seen as the middle of the beamgo project, as the center of the "bingo card".

The **middle NFT** of the "Beamgo card" will **never** be **distributed** in the **free beams**. The Beamgo Token is a wildcard in every round for the middle of the "Beamgo card".

So holding the Beamgo Token gives you a higher chance to win a prize.

		BEAMGO TOKEN		

The Beamgo Token

The middle of the Beamgo card is also a NFT. Every round the Beamgo tokens holders are guaranteed to receive the unique NFT from the author from that round. That unique NFT will not be distributed in the free beams, nor it will be available for sale after the round.

There will be a maximum of 250 Beamgo Tokens. The Beamgo Token will be available in quantities of 50. The cost price increases by 5% per batch. The first 50 are available in presale with a discount of 10% (early bird).

The Beamgo Token cost

Presale 1-50	10\$	-10% discount	9\$
Sale 51-100	10\$	+5%	10,5\$
Sale 101-150	10\$	+10%	11\$
Sale 151-200	10\$	+15%	11.5\$
Sale 201-250	10\$	+20%	12\$

Participating in Beamgo is free to play but the player can increase his chances:

1. Beamgo Token
2. **Beamgo Tickets**

The Beamgo Tickets

After distributing the first free beams, there will be a possibility to **buy Beamgo Tickets**.

This are "tickets" for extra NFTs. This are single Beam-QR codes who give you **1 random NFT**. There is a maximum of 1200 tickets per round. A Beamgo Ticket expires after using it.

A Beamgo Ticket can be bought in the nft.io marketplace. The single QR-beams are distributed on telegram. The price for a Beamgo Ticket will be around 1\$.

We love ARTists!

The Beamgo Artists

Every NFTartist can apply to have a Beamgo Round. This from a very well-known NFT artist to a starting artist.

The "Beamgo project" hopes to give artists an opportunity to reach a larger audience. The Beamgo-projects gives the artist an additonal opportunity to earn income *.

The participating artists will have the advantage of the "Beamgo"-bot / "Beamgo"-environment.

Let's be clear!

The Beamgo Incomes

The Beamgo project wants to clarify how incomes are distributed.

There are incomes from

1. Beamgo Tokens
2. Beamgo Tickets
3. Beamgo NFT sales

The Beamgo Incomes: Beamgo Tokens

65% for organising the round (minting NFT's ...)

25% goes into the prize pool

10% for promotion purpose (giveaways, extra prices, ...)

The Beamgo Incomes: Beamgo Tickets

40% Beamgo Project

30% Prize pool

30% Artist

The Beamgo Incomes: Beamgo NFTS

Collectors will get the opportunity to have all the NFTs from a round. Therefore, a limited amount of NFTs will become available after the round.

At the beginning there will be minted 320 NFT's for each number. 250 are reserved for public beams, 50 are reserved for Beamgo Tickets. 20 NFT's are for sale afterwards.

The cost of a single NFT can be set by the artist, but the statistics will be shared from previous rounds. The goal is admittedly to be accessible to a large audience.

The Beamgo Incomes: Beamgo NFTS

Without artists there is no art, nor there is Beamgo. The income of the sales from the sales will go for 70% to the artists. The artists will be paid out every month (or when it exceeds 10\$). This to reduce the gas fees.

Incomes Beamgo NFTS

70% Artist (net)

10% Price pool

20% Beamgo Project (including costs for gas fees)

After 6 months the remaining NFTs are melted.

Looking closer to a round...

Blueprint of a round

Every round has the following phases:

1. **Announcement of the round**
2. Start of the round
3. During the round
4. Claiming the win & announcement of the winners
5. End of the round

Announcement of the round

Every round will start with the announcement of a new artist, and the prices that can be won. All official communication will be done in the official Beamgo channels:

Telegram group "Beamgo"

Twitter "@Beamgo"

The announcement will be at least 1 week before the start of the round. The official time of the first beam will be announced exactly.

Blueprint of a round

Every round has the following phases:

1. Announcement of the round
2. **Start of the round**
3. During the round
4. Claiming the win & announcement of the winners
5. End of the round

Start of the round

The start is given as the first Beam will be launched in the Beamgo Telegram group / Beamgo Twitter group. Every beam contains 240 claims. This gives you a chance of 4.16% for 1 NFT.

Blueprint of a round

Every round has the following phases:

1. Announcement of the round
2. Start of the round
3. **During the round**
4. Claiming the win & announcement of the winners
5. End of the round

During the round

The beams will be distributed at random times (with different time zones in mind).

There will be at least 4 beams to have the first winner (if holding Beamgo Token).

There will be launched 25 beams during 1 round. (= 6000 NFT's)

There is a 4.16% chance for each NFT (excluding the BeamGo Token NFT).

Blueprint of a round

Every round has the following phases:

1. Announcement of the round
2. Start of the round
3. During the round
4. **Claiming the win & announcement of the winners**
5. End of the round

Claiming the win & announcement of the winners

Claiming the win of the round has to be done in the "Beamgo Telegram group: General Chat" by posting BEAMGO PUBLIC WALLETADDRESS

The history of the chat is final proof. Calling Beamgo without a valid beamgo-line will stop the round for that public wallet address. In the beginning the win has to be confirmed by a Beamgo-admin. Later this will be automated by the Beamgo bot.

After validating a Beamgo-line. The Beamgo-admin will confirm in the "Beamgo Telegram group: Game updates" the winner(s). The round will go further until all winners or known, or 48h after all "Beamgo Beams" are distributed. The distribution of the Beamgo Tickets stops 24h after the last beam.

Blueprint of a round

Every round has the following phases:

1. Announcement of the round
2. Start of the round
3. During the round
4. Claiming the win & announcement of the winners
5. **End of the round**

Claiming the win & announcement of the winners

If there are any prizes that are not claimed in a round, the prizes will be carried over to the next round and the prize pool will increase.

And what's behind...?

Beamgo Automatisation

The goal is to automate the entire "Beamgo" process. There is a central role for the "Beamgo bot". The bot will take on many tasks of the telegram group. The "Beamgo bot" has an integration with the Enjin API.

In addition to the "Beamgo-bot", a program is also being developed that takes on the tasks of minting, .. Participating artists only have to take on the design part. Beamgo wants to be accessible for every artist.

Why "Beamgo"?

Collecting NFT's is fun, the beam-technology of Enjin makes it accessible for everyone, and it adds an extra layer of mystic. Beamgo will add another fun part.

In this way, Beamgo also hopes to contribute to the awareness of their career. This for both experienced and new artists.

Timeline* Beamgo

SEPTEMBER 2023

Announcement project

Whitepaper will be published on Twitter

Start "Beamgo" Telegram

OKTOBER 2023

PRESALE BEAMGO TOKEN

Beamgo Token will be available on nft.io

Developing Beamgo Bot

During the first months the Beamgo Bot will gain functionalities.

END Q4 2024

TEST ROUND

A first test round will go live with the artwork of "Phil Park"

*Timeline is subject to the development of Enjin of the Enjin Matrixchain. Any changes will be published on the official channels.

Timeline* Beamgo

Q1 2024

First external artist

The first round with an external artist will go live.

Q2 2024

Beamgo Bot Live

The Alpha-Beamgo Bot is ready for its full round!

FROM Q2 2024

LET'S BEAMGO

Every 2 months there will be 1 round of "Beamgo"*

*1 month a round, 1 month pause. If there are enough enough participants, and artists, there will be a higher rate.

*Timeline is subject to the development of Enjin of the Enjin Matrixchain. Any changes will be published on the official channels.

The end is near...

FAQ

Which project are the NFTs part of?

The NFTs are part of the Beamgo Collection. Each NFT has certain metadata that makes them unique (artist, round, position, ...).

Can I buy multiple Beamgo Tokens?

Yes, you can. But there is no additional benefit for holding more than 1 Beamgo Token.

Who is the person behind this project?

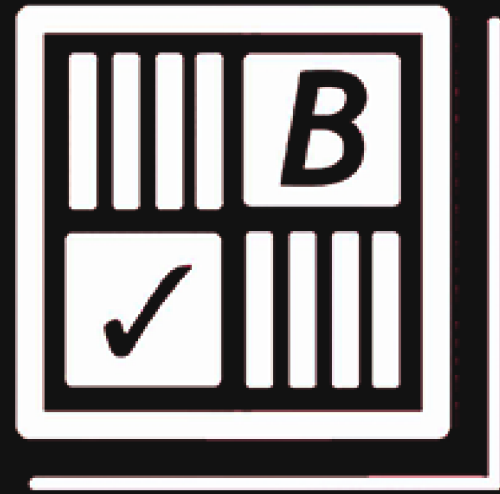

The Beamgo project is a project by Phil Park. An active member in the #Enjin community.

Twitter: @PhilPark_NFT

Discord: Phil_Park

Telegram: @ph_pa
